Description	Name	Hour	Price/Hour (INR)	Amount (INR)
1. Pixel raster graphics editor. Node base brush engine. Vector toolset extension. Photoshop PSD file interoperability to pixi editor.	1. CGI Vector	250	3530	882500
2. GPU rich scale LLM services. KVB token allocation Query vector. KVP vector block measuring LLM performance on NVIDIA GPU.	2. LLM benchmark	175	4250	743750
3. Cache Gen chunky bit data. KV Cache streaming setup fast LLM operational token driven context. Wikitext LLM document dataset rendering Time to First token graph builder.	3. Cache Gen wikitext	195	4840	943800
4. ARG augmented retreival generator. Agent chaining text processor on vLLM server. Text conversion support on TGI server. Sequential chain map builder.	4. vLLM text builder	150	5325	798750
5. Beam algorithms customize COW mechanism. Paging segmentation on KV cache block configuring with LLM block. Pytorch base Pydantic tool for knowledge graph creation.	5. Beam pytorch analytics	148	3800	562400

Remark : LLM streamlined array of product for dubai location client.
